

ICNR 2016 CO-CHAIRS

José L. Pons,
Cajal Institute, CSIC, Spain
jose.pons@csic.es

José M. Azorín,
Miguel Hernandez University of Elche,
Spain
jm.azorin@umh.es

Steering Committee

Metin Akay (Chair),
University of Houston, USA

José L. Pons,
Cajal Institute, CSIC, Spain

Silvestro Micera,
École Polytechnique Fédérale de
Lausanne, Switzerland.

Dario Farina,
University Medical Center Göttingen,
Germany

Jose Carmena,
University of California, Berkeley, USA

Paolo Bonato,
Spaulding Rehabilitation Hospital,
Boston, USA

Scientific Program Committee Co-Chairs

Theodore W. Berger,
University of Southern California, USA

Eric Perrault,
Northwestern University,
Rehabilitation Institute of Chicago, USA

Marco Santello,
University of Arizona, USA

Clinical Program Committee Co-Chairs

Marco Molinari,
Fondazione Santa Lucia, Rome, Italy

Enrique Viosca,
La Fe Hospital, Valencia, Spain

Industrial Program Committee Chair

Freygardur Thorsteinsson,
Össur, Iceland

The International Conference on NeuroRehabilitation
La Granja de San Ildefonso (Segovia), Spain
October, 18-21, 2016

CALL FOR PAPERS

Restoring human motor and cognitive function has been a fascinating research area during the last century. Interfacing the human nervous system with mechatronic systems to restore neuromotor abilities is facing its crucial passage between research and actual clinical reality, enhancing the potentialities of therapists, clinicians and researchers to rehabilitate, diagnose and generate knowledge. After the success of ICNR2012 (Toledo, Spain) and ICNR2014 (Aalborg, Denmark), the 2016 International Conference on Neurorehabilitation, ICNR2016 (<http://www.icnr2016.org>) will aim at bringing together global research, clinical and industrial communities to a forum where the current status and future trends in Neural Rehabilitation are discussed from scientific, clinical and translational perspectives. Thus, ICNR2016 will meet researchers and students from the fields of Clinical Rehabilitation, Applied Neurophysiology and Biomedical Engineering in order to promote, feed and encourage this new area.

The program will be composed by regular, special and poster sessions, and workshops. Furthermore, plenary lectures will be given by well-known scientists in the field of NeuroRehabilitation. The program will aim at enriching the knowledge of the participants, widening their point of view on specific topics related to NeuroRehabilitation, and getting in closer contact with experts in this field.

Prospective authors will submit extended abstract contributions (2 pages). All contributions will be peer reviewed. Accepted contributions will appear in the Conference Proceedings. Furthermore, authors of the best papers will be invited to submit an extended version in a special issue of the International Journal of Neural Systems (Impact Factor: 6.507).

ICNR2016 will take place in the Royal Residence of La Granja (Segovia, Spain) in October 18-21, 2016. The Royal Residence of La Granja is a beautiful small town just 11 kilometers away from Segovia, at the foot of the Central System mountain chain. La Granja boasts a spectacular Parador (hotel) housed in the Casa de los Infantes (House of the Infantes), built by Charles III in the 18th century as a home for the infantes Gabriel and Antonio, and the headquarters of the Guardia de Corps, which contains a modern conference and convention center, just 55 minutes from Madrid. The hotel is in the heart of the Sierra de Guadarrama mountains, near the Royal Palace of La Granja, with its beautiful gardens and fountains, and the Royal Glass Factory (now the Museum of Glass). The Royal Palace of La Granja, built for Philip V has been called "the Versailles of Spain".

Important Dates:

- March 1, 2016: Deadline for proposals to organize workshops
- April 1, 2016: Deadline for abstract submission
- May 15, 2016: Notification of Acceptance
- June 15, 2016: Author Registration Deadline
- June 15, 2016: Final Version Submission
